Appendix 4 – Sites Awaiting S106

Flintshire County Council Housing Monitoring Statement April 2017

1.0 SUMMARY

- 1.1 There is currently no up-to-date development plan for Flintshire as the Unitary Development Plan is time expired and there is no adopted Local Development Plan (LDP). Welsh Government Guidance as set out in Technical Advice Note 1 (TAN1) Joint Housing Land Availability Studies (JHLAS), January 2015 states 'Therefore local planning authorities that do not have either an adopted LDP or UDP will be unable to demonstrate whether or not they have a 5 year housing land supply and effectively will be considered not to have a 5 year supply. Those LPAs without an adopted development plan will be unable to produce a JHLAS until an adopted LDP is in place. However, it is still important to monitor the level of housing provision and annual completions.
- 1.2 This document summarises the housing data as at 1st April 2017 for the purposes of monitoring and to contribute towards the evidence base for the LDP. It follows the guidance in TAN1 and contains the Council's estimates of the number of units likely to be completed in the next five years.

2.0 HOUSING LAND SUPPLY

- 2.1 The five year land supply comprises large and small sites with planning permission (outline or full), remaining site allocations for housing in adopted development plans, and sites with a resolution to grant planning permission subject to a S106 agreement being signed, categorised as prescribed in TAN 1.
- 2.2 This document incorporates a calculation of housing supply based on the past completions rate. TAN1 requires Local Authorities to use the residual method but this is not possible as the UDP is time expired, and in addition to this, the Council does not consider that using the residual method alone provides an accurate or complete picture of the housing land supply.

2.3 TAN1 categorises sites as follows:

Category 1	Sites or the phases of sites which are under construction (relating only to the area where building is in progress).
Category 2	Sites or the phases of sites where development either can commence immediately or the constraint on development is likely to be removed so that there is reasonable time for dwellings to be completed within 5 years.
Category 3	Sites or phases of sites where the Study Group agree that it is not financially viable to develop the site due to market conditions, but which are otherwise free from constraints. (Although Category 3 sites will not form part of the 5-year supply, their identification may assist local planning authorities, developers and landowners in finding opportunities to improve site viability and deliverability.)
Category 4	Sites or the phases of sites where development is unlikely within 5 years by virtue of major physical constraints or other constraints as agreed by the Study Group.

Large Site Supply

Table 1 – Identified Housing Land Supply

Housing Land Supply (1st April 2017 to 1st April 2022) – Large Sites					
	5 Year Land Supply (TAN 1 categories)		Beyond 5 Years		Homes Completed Since Last Study (Large and small sites)
	Cat 1 (u/c)	Cat 2	Cat 3	Cat 4	
Total	210	2488	1083	21	421

Table 2 – Five year land supply breakdown – large sites (i.e. Categories 1 and 2)

Private	2639
Public / Housing Association	64
Total	2698

Small Site Supply

- 2.4 The contribution from small sites of less than 10 dwellings is based on the completions for the last five years.

Table 3 – Small Site Completions for the Previous 5 Years

2012-13	2013-14	2014-15	2015-16	2016-17	Total
54	128	81	87	102	452
5 year average (452/5)					90

- 2.5 The overall 5 year supply from these sources (large and small sites) is **3150 (2698 + 452)**.

Supply from S106 Sites

- 2.6 As stated in paragraph 2.1, sites that have a resolution to grant planning permission subject to the signing of a S106 agreement can contribute to the 5 year supply. This is on the basis that the resolution to grant was prior to 31st March 2017, and that there is a clear intention from the applicant to develop the site.

Table 4 – Supply from S106 Sites

Sites	Units
Small sites	33
Large sites	17
Total	50

- 2.7 In total, all the source of the 5 year land supply amount to 3200 units.

Source	Units
Large sites (category 1 and 2)	2703
Small sites	452
Sites pending S106 (large and small sites)	50
Total	3200

3.0 CONCLUSION

- 3.1 Given that the Council is currently unable to demonstrate a 5 year land supply, a guidance note for developers has been produced which seeks to ensure that speculative sites put forward on the basis of a lack of housing land supply are genuine and developed development proposals, as opposed to simply adding supply on paper only and not an exercise in simply adding value to land (<http://www.flintshire.gov.uk/en/PDFFiles/Planning/FCC-Developer-Guidance-Note-Speculative-Housing-Development.pdf>).
- 3.2 The Council is of the opinion that the present TAN1 methodology is flawed in respect of the assumption that Local Authorities with no adopted LDP are deemed not to have a 5 year supply, and also that using the residual method alone does not provide an accurate reflection of the actual land supply.
- 3.3 Although unable to undertake a formal land supply calculation, the Council consider it important to provide an informal measurement of land supply based on a past completions calculation. This at least provides a measurement of land supply against the performance of the house building industry. Based on the past building rates method over a 5 year and 10 year period the land supply amounts to 6.6 and 8.1 years respectively. The Council is of the view that past building rates method clearly show the actual level of supply, compared with what the development industry is achieving on the ground, and is more reflective of recent economic conditions and reduced levels of house building. As shown in Appendix 4, the past building rates method indicate a 5 year supply of 7.1 and 7.6 years using 5 year past completions and 10 year past completions respectively.
- 3.4 The Council considers the most appropriate means by which to increase housing land supply is through the preparation of the Local Development Plan. The Council has undertaken a Call for Candidate Sites and these site have been consulted upon and are being assessed. The Council has undertaken engagement and consultation on the strategic growth and spatial options and more recently on the pre-deposit consultation draft Plan (Preferred Strategy). The LDP will ensure that sites can be identified based on a rigorous and transparent assessment and against an agreed spatial strategy rather than on an ad hoc basis. The Council does not therefore intend to implement any formal steps to increase housing land supply, as to do so would divert resources away from progressing the LDP.
- 3.5 Nevertheless, there are two ways in which the Council can facilitate sustainable housing development which will improve the housing land supply. Firstly, the Council will continue to work with landowners and developers in bringing forward appropriate and sustainable windfall housing sites as well as addressing any difficulties or obstacles preventing the delivery of allocated sites. Applications for sites within settlement boundaries will generally be looked upon favourably provided that they satisfy the Plan's policies. Applications on sites outside of existing settlements will be assessed on their individual merits in terms of whether they represent logical and

sustainable development having regard to material planning considerations and will not be approved merely because they would increase housing land supply. They must also be capable of demonstrating that they can positively increase supply in the short term (e.g. by granting a short term permission) otherwise they would not be capable of meeting the requirements of TAN1, particularly in relation to deliverability.

Secondly, the Council is presently progressing its Strategic Housing and Regeneration Programme (SHARP) [http://www.flintshire.gov.uk/en/Business/Strategic-Housing-and-Regeneration-Programme/Strategic-Housing-and-Regeneration-Programme-\(SHARP\).aspx](http://www.flintshire.gov.uk/en/Business/Strategic-Housing-and-Regeneration-Programme/Strategic-Housing-and-Regeneration-Programme-(SHARP).aspx) which aims to develop 500 social, affordable and rent to buy homes the next 5 years. The programme also has scope for the Council to include land for the development of private market homes, where sites contribute to the overall Programme i.e. the delivery of affordable housing. The preferred development partner Wates Living Space was appointed in May 2015 and has progressed some schemes with more currently in progress and others due to come forward.

APPENDIX 4

Past Completions Calculations

As stated above the 5 year supply is 3205 in total.

5 Year Past Completions

A	Total Previous 5 Year Completions (2012-2017)	2640
B	Average Annual Completions	452
C	Total 5 Year Land Supply	3200
D	Land Supply in Years (C/B)	7.1 years

10 Year Past Completions

A	Total Previous 10 Year Completions (2007-2017)	4155
B	Average Annual Completions	416
C	Total 5 Year Land Supply	3200
D	Land Supply in Years (C/B)	7.7 years
