

# SUBMISSION STATEMENT

in respect of

Flintshire LDP (2015 to 2030) Examination

on behalf of

Castle Green Homes & N and P Jones (ID 1235341)

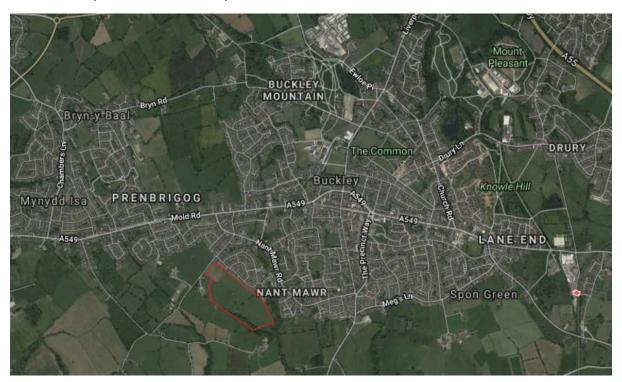

Matter 20

May 2021

### This representation is submitted on behalf of Castle Green Homes and N & P Jones.

Castle Green are (at the time of this submission) on the cusp of signing an option agreement with the (single entity) owners of the land (N & P Jones).

The site extends to include a single parcel of greenfield land that benefits from direct access off Well Street, Buckley as illustrated on the plan below.

It is located in a highly sustainable and accessible position directly adjacent to the Buckley settlement boundary and would offer an ideal residential extension being within easy walking distance of existing services and facilities.

The land to the north west was identified for release in the UDP for 162 units (ref. HSG1(3)) but never came forward. It has been "rolled forward" as a draft LDP allocation (HN1.1) for 159 dwellings. A pre-application consultation was submitted by CAHA in July 202 for 150 units.

Castle Green consider that both sites can come forward and indeed there would be highway access benefits in considering such an approach.

But it must also be noted that there is still no guarantee the Well Street West site will be delivered and that this site (Well Street East) must be considered favourably given its advanced position.

The promoters have investigated all technical aspects (highways, drainage, contamination, air quality, agricultural (it's Grade 3b), trees and ecology.

There is nothing to prevent this site from coming forward and it offers a natural and logical release and development extension to Buckley a Tier 1 settlement.

Highway access is available off Well Street.

It comprises an area extending to 12 ha and is considered to be capable of delivering up to 270 units – illustrated by the layout plan below and the accompanying **Vision Prospectus document dated**March 2021 that is appended to this representation.

In the absence of any other reasonable alternatives this site offers a suitable candidacy for housing growth, all things considered.

We would invite the Inspector to consider (under the power vested in them and as guided by Para 6.58 of DPM3) to recommend this site be included as a new / alternative site. This is endorsed by the opportunity to identify new sites under Para 3.75 as part of any MACs process.

### **Matter 20 – Monitoring Framework**

#### Key Issue:

Does the LDP enable adequate monitoring of its effectiveness?

Please refer to J10 POLICY FRAMEWORK Conformity and Consistency Checklist and the J10 SOUNDNESS Checklist for more detail

a) Are clear targets and measurable outcomes in place for effective monitoring of delivery of the development and allocated sites and achievement of LDF objectives?

Annual Monitoring will illustrate how the trajectories for the AABR are delivering on allocated sites and the overall housing requirement, including whether the quantum of windfalls and extant commitments have also been delivered.

DPM3 states that all indicators must be specific, measurable and realistic.

The trouble is the current trajectory does not provide a breakdown for the delivery of affordable housing.

The same goes for job growth and employment land take-up: this question has been posed during the Examination but no answer has been provided.

Two mechanisms for Review are provided for:

- Short-Form Revision (SFR): which WG suggest should take no longer than 1.5 years (+ 3mth slippage) form start to finish.
- Plan Review: which the WG suggest must take place no later than 4 years from eth date of adoption. So, if the plan is adopted in Jan 2022 then it will have to commence by no later than Jan 2026.

Despite WG stating in Matter 7 that they expect plan monitoring to reflect DPM3 guidance we have limited confidence in WG "holding" FCC (or other Councils) to these timescales and do not believe that even "persistent failure" will carry any penalty.

WG representatives have shown, in this Examination, that they are happy to relax almost every element of PPW11 and DPM3 (sic. plan period, BMV approach, Green Barrier Review, rolled-over UDP sites, NDA and UDP shortfall, viability and deliverability evidence).

We forsee the inevitable excuse coming round the corner ... in that SDP is taking priority over any required Review and WG will sympathetically agree to slippage.

With TAN1 and a 5-year hosing land supply requirement abolished there is now no sanction now for under-performance and under-delivery. The entire system is toothless and the message is clear that if a plan fails then the slate can be wiped clean.

In reality, slippage in any SFR or Full Review will happen; FCC's track record does not instil confidence, so even if, like the UDP Inspector, mention is made by the LDP Inspector of 'doing this or that' the messages will be ignored. Moreover, there is little point in seeking/recommending even an 'early review' because FCC would have to start that now to have any chance of achieving a new plan before 2030.

b) Are triggers timely and do they allow for an effective response to be made in the event that remedial action is required? In particular, how will additional sites be brought forward if there is a persistent shortfall in housing delivery?

No.

It is unclear how any additional sites will be brought forward.

FCC have suggested during the Examination that they believe they are over-allocating which provides a cushion.

They also suggested that sites in their Urban Capacity Study would come forward as windfalls and indeed that it would be their preference that they do prior to having to allow for any out of settlement boundary windfalls.

However, this approach is flawed since none of the sites have proven deliverability or viability credentials.

### c) Are clear arrangements in place for monitoring and reporting the results?

Apart from the AMR there is likely to be nothing more than figures produced as opposed to qualitative information about eth status of allocations and whey they are not performing and delivering.

#### d) Have remedial actions been identified?

No "Plan B" contingency has been provided for; we would recommend Reserve/Plan B sites are identified and that additional land be "safeguarded" for future release, but land that has proven deliverability and viability.

Para 3.76 DPM3 states that: "In preparation for the examination the LPA should have a prioritised list of potential reserve sites which it considers could be substituted as alternatives and added to the plan, should additional sites be required following consideration of the plan through the formal hearing sessions." – however, no list has been published.

Para 3.77 states that "Reserve sites are not allocations, they are sites that the LPA considers suitable and deliverable in relation to the strategy, but are not required at this point in time. There is no requirement to identify them as such. It is essential that all relevant key stakeholders are informed of any reserve sites and have the opportunity to make comments." — this has not been undertaken.

Para 3.78 states that "The SA should demonstrate how reserve sites would fit with the plan's strategy, if they were considered necessary. Such sites are not promoted by the LPA for inclusion in the plan, they would only be included in the plan if the Inspector, through the examination process concludes there is a shortfall of sites and additional or alternative allocations for different land-uses are necessary."

We would invite the Inspector to consider (under the power vested in them and as guided by Para 6.58 of DPM3) to recommend that the sites promoted by us at Mold, Buckley and Broughton be included as new alternative sites. This is endorsed by the opportunity to identify new sites under Para 3.75 as part of any MAC's process.

# e) Have the main risks to delivery been identified, and how will contingencies be handled?

No plan for contingencies has been made.

We have identified the risks for delivery throughout this Examination and have raised our concerns about plan soundness (lack of it).

# PLANNING POLICY FRAMEWORK ASSESSMENT

The following checklist table provides our assessment of National Planning Policy comprising the NDP Future Wales (February 2021) and PPW11 (February 2021) along with the procedural guidance published by WG (DPM3 – March 2020) and the recent WG paper entitled Building Better Places ("Placemaking and the Covid Recovery") published in July 2020.

We have found that the eLDP has failed to follow DPM3 guidance and fails to reflect the policies of the NDP or PPW11, to such an extent that when one considers the tests of soundness you arrive at no other conclusion than to find this plan unsound.

FUTURE WALES (NDP)	What the policy document says	J10 Comment
Outcome 1	Emphasis placed upon development being well located in relation to jobs, services and accessible green and open spaces	eLDP has not made the most of the spatial connection between jobs and homes.
Outcome 5	Development plans will enable and support aspirations for large towns and cities to grow, founded on sustainability and urban design principles.	eLDP has not followed this in its hierarchy or site allocations; it has failed to consider the most sustainable places and locations.
Policy 1 : where Wales will grow	Deeside is designated as a National Growth Area, but even beyond this area large scale growth should be focused on the urban areas and development pressures should be channelled away from the countryside and productive agricultural land can be protected.	eLDP fails to protect BMV.
Policy 2 : strategic placemaking	The growth and regeneration of towns and cities should positively contribute towards building sustainable places that support active and healthy lives, with urban neighbourhoods that are compact and walkable, organised around mixed-use centres and public transport, and integrated with green infrastructure. Urban growth and regeneration should be based on the following strategic placemaking principles: building places at a walkable scale, with homes, local facilities and public transport within walking distance of each other;	There is nothing compact or walkable about locating development in places such as STR3B (Warren Hall) or indeed some of the other housing allocations (HN1.6 and HN1.7) where reasonable alternatives have not been considered and these will sites have limited credibility associated with sustainability and placemaking aspirations.

Policy 3 : public sector leadership  Policy 7 : affordable homes	The public sector's use of land, developments, investments and actions must build sustainable places that improve health and well-being.  Through their Strategic and Local Development Plans planning authorities should develop strong evidence based	WG's assets in FCC are not meeting the needs of this Policy; STR3B (Warren Hall) is not sustainable and HN1.1 (Well Street) is not showing it will deliver anything different from mainstream market housebuilders; both failed to come forward in the UDP.  The evidence base is weak and flawed.
Policy 12 : regional connectivity	policy frameworks to deliver affordable housing  Sustainable growth is supported in urban areas where aim is to improve and integrate active travel and public transport. So where there are key nodes, this would suggest growth should be concentrated at these locations; particularly if they are National and Regional Growth Areas.	Many of the housing allocations (in particular STR3B, HN1.6 and HN1.7) cannot justifiably meet sustainable travel aspirations.
Policy 19 : strategic policy  Policy 20 : national growth area	Must take account of cross-border relationships and issues.  Local Development Plans across the region must recognise the National Growth Area as the focus for strategic economic and housing growth	eLDP fails to consider key cross-boundary issues (e.g. housing, Green Belt).  Deeside is a National Growth Area, yet the growth and spatial strategy does not concentrate upon this for housing growth.
Policy 23 : North Wales Metro	Planning authorities should plan growth and regeneration to maximise the opportunities arising from better regional and cross border connectivity, including identifying opportunities for higher density, mixed-use and car-free development around new and improved metro stations.	This policy is not even registered in the eLDP and spatial growth has certainly not reflected such aspirations.

BUILDING BETTER PLACES (BBP)	What the policy document says	J10 Comment
Introduction	Plans should not roll forward unsustainable spatial strategies or be identical to neighbouring authorities' plans, rather they should actively embrace the placemaking agenda set out in PPW."	eLDP has "rolled forward" a number of failed UDP allocations and failed to question them or consider reasonable alternatives
On LDP's (pg 7)	this does not mean that they should roll forward policies or proposals on sites which do not encourage good places	As per above point
On Staying Local (pg 14)	as well as protecting our Best and Most Versatile Agricultural (BMV) land from development.	Emphasis on protecting BMV is made
	We will expect proposals for new communities (in rural and urban areas) and housing sites to integrate with existing services and infrastructure	New development should integrate with existing services, yet some sites (in particular STR3B (Warren Hall) this is freestanding and fails to offer this.
On Active Travel (pg	The planning system must ensure the chosen locations and resulting design of new developments support sustainable travel modes and maximise accessibility by walking and cycling. New development should improve the quality of place and create safe, social, attractive neighbourhoods where people want to walk, cycle and enjoy. We should not be promoting sites which are unlikely to be well served by walking, cycling and public transport	Again, some sites (in particular STR3B (Warren Hall) fails to meet this expectation.

DEVELOPMENT PLAN MANUAL (DPM3)	What the policy document says	J10 Comment
Para 3.30 regarding evidence base	Detailed evidence upfront and early in the plan making process is essential to inform the delivery of the preferred strategy and subsequent plan stages. A greater depth of evidence at the candidate site stage is essential.	FCC did not undertake detailed evidence for Green Barrier or BMV this has meant that candidate sites were discounted too early in the plan making process and others were taken forward ignorant of their sustainability, deliverability or technical (GB/BMV) credentials. This is a fatal flaw of the plan, along with not considering reasonable alternatives and discounting them too easily and early on.
Para 3.36 regarding key principles behind any evidence to prove and justify allocations	The evidence must enable the LPA to assess the following:  • Is the site in a sustainable location and can it be freed from all constraints?  • Is the site capable of being delivered?  • Is the site viable?	These core principles have been ignored in both the consideration of candidate sites but also in selecting sites for draft allocations, many of which are not sustainable and have not proven to be deliverable or viable.
Paras 3.79 to 3.84 regarding evidence base		Evidence base must be relevant, proportionate and focussed. It must be fresh for a new LDP. It must respond to PPW (sic. BMV) and should not be sought after a policy choice has been made (as FCC have done by retrospectively publishing evidence base).
Para 3.43 regarding delivery	The key objective an LPA should establish is whether a site promoter has a serious intention to develop the site and can do so within the timeframe of the plan Candidate sites should be sustainable, deliverable and financially viable in order to be considered for inclusion in the plan by an LPA. All sites should satisfy the broad parameters and information emitted by the LPA and have sufficient financial headroom to accommodate all of the plan's policy requirements. For the purposes of this Manual ensuring sites in plans are deliverable means both in terms of deliverability and financial viability	This guidance has not been followed by FCC

5 0 44 !!		
Para 3.44 regarding deliverability	The site promoter (LPA, land owner and/or developer) must carry out an initial site viability assessment and provide evidence that sites can be delivered. As required by national policy, all candidate sites are subject to a viability assessment. However, the level of detail and information required for this assessment should be meaningful and proportionate to the site's	This guidance has not been followed by promoters or sought by FCC
	significance in the development plan	
Para 3.47 to 3.55 Regarding viability Para 5.87	Viability and deliverability starts at the candidate stage where all submitted sites should be accompanied by a viability assessment	FCC have failed to follow the procedures set out in the Manual and not requested such information; the bar being set higher for key strategic allocations.
Para 5.88	site specific viability appraisals should be undertaken for those sites which are key to delivering the plan	Retrospectively providing this is no substitute for what should have been done at the Candidate site stage where such evidence should have been publicly available.  Sadly FCC have a track record in this eLDP in publishing evidence base to retro-fit their preferred strategy and site allocations; this includes
		seeking statutory consultee reviews at the 11 <sup>th</sup> hour.
Para 3.69 regarding alternatives	To demonstrate the plan is sound at examination, LPAs will need to justify their criteria and associated site assessments. The criteria must be in accordance with the principles of sustainable development and placemaking as set out in PPW. The SA must document the assessment and provide a reasoned justification for the site status (rejected, reasonable alternative or preferred). Candidate sites should only be rejected outright if they have no potential to be either a proposed site, or a reasonable alternative. This can then inform the plan allocations needed to deliver the strategy. This must be a transparent process clearly documented in the final SA Report for the deposit plan.	The identification of site allocations has not been done following the principles of sustainable development and reasonable alternatives have not been assessed and were discounted out of hand.

Para 3.75 regarding new	The two avenues for including new sites	There is an opportunity to

If an offendable bearings to the second	CCC's sees seed of
high it is unlikely that those levels will be delivered and may impact on the delivery	FCC's assessment of viability is flawed as it assumes rates of
management process. The targets chosen must be realistic and align with the evidence base and the assumptions within it.	affordable delivery that outstrip those of neighbouring areas (CWAC 30%, Wrexham 0 to 30%, Shropshire 10%).
Where there are costs associated with infrastructure requirements, for example, access improvements or the provision of affordable housing, these should be factored into a viability assessment.	Significant utility infrastructure has been identified on a number of key sites, yet no evidence is available to show that any viability has been produced to demonstrate deliverability is proven.
	Identifies parties such as WG (LQAS – re. BMV); Local Health Boards (need for primary health care facilities), Welsh Water, NRW, etc all of whom should be engaged as early as possible to consider capacity and compliance – yet many have not been engaged at all or if so only at the 11 <sup>th</sup> hour following Deposit and at the point of Submission.
New development must bring with it the timely provision of infrastructure. The development plan strategy should identify the phasing of development throughout the plan period, linked directly to the delivery of infrastructure. Evidence needs to be in place to demonstrate how infrastructure supports the housing trajectory.	We can see no evidence of this link and consideration of the strategic and non-strategic housing sites and Promoters do not appear to have factored into account infrastructure either in terms of timing and delivery of the allocations or their viability.
	delivered and may impact on the delivery of sites and elongate the development management process. The targets chosen must be realistic and align with the evidence base and the assumptions within it.  Where there are costs associated with infrastructure requirements, for example, access improvements or the provision of affordable housing, these should be factored into a viability assessment.  New development must bring with it the timely provision of infrastructure. The development plan strategy should identify the phasing of development throughout the plan period, linked directly to the delivery of infrastructure. Evidence needs to be in place to demonstrate how infrastructure

PPW11	What the policy document says	J10 Comment
Para 1.18 : sustainable development	Legislation secures a presumption in favour of sustainable development in accordance with the development plan unless material considerations indicate otherwise	Key aim is to achieve sustainable development – the eLDP spatial strategy and many of the housing sites cannot claim to be sustainable.
Para 1.26 : LDP's	Evidence is needed to support LDP policies which is tested through the Examination procedure.	The eLDP evidence base is poor and at best falls woefully short of expectations (sic. BMV, Green Wedge, site, plan and affordable viability).
Para 2.15 : sustainable placemaking	The national sustainable placemaking outcomes should be used to inform the preparation of development plans and the assessment of development proposals.	Sustainable placemaking has been forgotten in this eLDP.
Para 3.44: spatial strategy and search sequence (see also Para 4.2.16)	Where there is a need for sites, but it has been clearly demonstrated that there is no previously developed land or underutilised sites (within the authority or neighbouring authorities), consideration should then be given to suitable and sustainable greenfield sites within or on the edge of settlements. The identification of sites in the open countryside, including new settlements, must only be considered in exceptional circumstances and subject to the considerations above and paragraph 3.50 below. The search process and identification of development land must be undertaken in a manner that fully complies with the requirements of all relevant national planning policy.	The search sequence has not been followed and BMV is used, Green Wedge is used and more sustainable locations have been discounted for no apparent reasoning.
Para 3.50 : accessibility	A broad balance between housing, community facilities, services and employment opportunities in both urban and rural areas should be promoted to minimise the need for long distance commuting. Planning authorities should adopt policies to locate major generators of travel demand, such as housing, employment, retailing, leisure and recreation, and community facilities (including libraries, schools, doctor's surgeries and hospitals), within existing urban areas or areas which are, or can be, easily reached by walking or cycling, and are well served by public transport.	FCC generates significant levels of in and out-commuting but this eLDP fasil to address this and then to compound matters seeks to identify new housing/employment sites (e.g. STR3B and others) in unsustainable and disconnected locations as opposed to considering reasonable alternatives.

2 F.4 . no sottle	Now cottlements should and the	CTD2D is offertively a very

	trajectory when they are due to come forward for development, in order to support the creation of sustainable communities.	
Para 4.2.12 : specialist housing	Planning authorities should also identify where interventions may be required to deliver the housing supply, including for specific sites. There must be sufficient sites suitable for the full range of housing types to address the identified needs of communities, including the needs of older people and people with disabilities. In this respect, planning authorities should promote sustainable residential mixed tenure communities with 'barrier free' housing, for example built to Lifetime Homes standards to enable people to live independently and safely in their own homes for longer.	There is no policy in the eLDP that supports specialist housing needs or indeed quantifies this.
Para 4.2.16; housing search	When identifying sites to be allocated for housing in development plans, planning authorities must follow the search sequence set out in paragraphs 3.43-3.45, starting with the re-use of previously developed and/or underutilised land within settlements, then land on the edge of settlements and then greenfield land within or on the edge of settlements.	The eLDP has failed to follow this search sequence, because had it done so sites at Mold, Buckley and Broughton would not have been discounted in favour of sites that are clearly less sustainable, involve BMV and Green Wedge.
Para 4.1.18 : housing led regeneration sites	Housing led regeneration sites can sometimes be difficult to deliver, making timescales for development hard to specify. Where deliverability is considered to be an issue, planning authorities should consider excluding such sites from their housing supply so that achieving their development plan housing requirement is not dependent on their delivery. This approach requires planning authorities to put in place a strategy to support the delivery of these sites. The criteria for identifying housing led regeneration sites can include demonstrating the sites have high credentials in terms of sustainable development and placemaking, such as being aligned to transport hubs or addressing contamination or industrial legacy; proven need and demand for housing in that area; and that the proposed intervention is the best means of addressing a site's contamination and constraints.	STR3A should be excluded due to its clear deliverability constraints.  As for STR3B this is not a regeneration site but masquerades to be one whereas in actual fact is it a greenfield site in a wholly unsustainable location involving a new settlement.

Para 4.2.19:  deliverability  As part of demonstrating the deliverability of housing sites, financial viability is evidenced in support of their inclusion as allocations in a development plan. At the 'Candidate Site' stage of	
viability must be assessed prior to their inclusion as allocations in a development plan. At the 'Candidate Site' stage of the housing allocation sites.	•
inclusion as allocations in a development sites. plan. At the 'Candidate Site' stage of	
plan. At the 'Candidate Site' stage of	
development plan preparation land	
owners/developers must carry out an	
initial site viability assessment and	
provide evidence to demonstrate the	
financial deliverability of their sites. At	
the 'Deposit' stage, there must be a high	
level plan-wide viability appraisal	
undertaken to give certainty that the	
development plan and its policies can be	
delivered in principle, taking into account	
affordable housing targets,	
infrastructure and other policy	
requirements. In addition, for sites which	
are key to the delivery of the plan's	
strategy a site specific viability appraisal	
must be undertaken through the	
consideration of more detailed costs,	
constraints and specific requirements.	
Planning authorities must consider how	
they will define a 'key site' at an early	
stage in the plan-making process.	
Planning authorities must also consider	
whether specific interventions from the	
public and/or private sector, such as	
regeneration strategies or funding, will	
be required to help deliver the housing	
supply.	
Para 4.2.20 : affordable Where new housing is to be proposed, The affordable housing	
levy and viability   development plans must include policies   policy is itself unviable	
to make clear that developers will be the housing allocations	s do

## **SOUNDNESS ASSESSMENT**

The following checklist table provides our assessment on the soundness of the LDP following the Para 6.26 (Table 27) tests of soundness approach set out in DPM3. We find that the eLDP must, in its current state with its associated evidence base, be found to be unsound. The Inspector is invited to concur with this and recommend FCC withdraw their plan. The only potential way of avoiding this is for FCC to agree with our overall findings, particularly in respect of the way they have approached BMV, Green Barrier, reasonable alternatives and increasing housing land supply, and identify the sites we have identified at Mold, Buckley and Broughton.

SOUNDNESS TEST : Checklist	J10 Response		
TEST 1 : Does the plan fit ? (is it clear that the LDP is consistent with other plans?)			
Does it have regard to national policy PPW / NDF and in	No		
general conformity with the NDP?			
Does it have regard to the Well-being Goals?	No comment		
Does it have regard the Welsh National Marine Plan?	No comment		
Does it have regard to the relevant Area Statement?	No comment		
Is the plan in general conformity with the NDP?	No		
Is the plan in general conformity with relevant SDP?	Not yet applicable		
Is it consistent with regional plans, strategies and utility No			
provider programmes?			
Is it compatible with the plans of neighbouring LPA's?	No		
Has the LPA demonstrated it has exhausted all	No		
pportunities for joint working and collaboration on both			
plan preparation and the evidence base?			
TEST 2: Is the Plan Appropriate? (is the plan appropriate	for the area in the light of the		
evidence ?)			
Is it locally specific?	No comment		
Does it address the key issues?	No		
Is it supported by robust, proportionate and credible	No		
evidence?			
Can the rationale behind the plan's policies be	No		
demonstrated?			
Does it seek to meet assessed needs and contribute to	No		
the achievement of sustainable development?			
Are the vision and strategy positive and sufficiently No			
aspirational?			
Have the 'real' alternatives been properly considered?	No		
Is it logical, reasonable and balanced?	No		
Is it coherent and consistent?	No		
Is it clear and focused?	No		
TEST 3 : Will it Deliver ? (is it likely to be effective?)			
Will it be effective?	No		
Can it be implemented?	No		
Is there support from the relevant infrastructure	No		
providers both financially and in terms of meeting			
relevant timescales?			
Will development be viable?	No		
Can the sites allocated be delivered?	No		
Is the plan sufficiently flexible? Are there appropriate	No		
contingency provisions?			
Is it monitored effectively?	No comment
